Objective

Motivated Junior Front End developer with the knowledge of HTML, CSS and Javascript. I have a strong foundation in creating responsive, user-friendly web applications with the help of modern frameworks like React and Next JS. I am committed to deliver my best to create innovative, high-quality, visually appealing web applications. I have a great eye for design, a careful approach to coding, and strong commitment to staying current with industry trends and best practices. My goal is to try to make myself better everyday with the technologies I am familiar with to ensure the best performance.

Skills

Frontend : React JS, Next JS

Backend : Express JS

Database : Mongo DB

Tools : Github, Tailwind CSS, Figma

Projects

Knowledge Hub

A website to maintain the books of a library.

- A user can create an account to see full details about different books. He can add a book with characteristics like book name, book photo, book description, book rating, book quantity etc.
- A user can borrow books and return the books before a specific date. He can also update a book with characteristics like book name, book photo, book description, book rating, book quantity etc.
- A user can buy all the books they have borrowed from the website.

Technology : Html , Css, Javascript, Tailwind Css, React JS, Express Js, MongoDB, Stipe JS

Crafty Canvas

A website to learn about arts.

- A user can create an account and login securely. Then users can upload their art with details like name, description, customizable, category, rating and photo url. The art will be saved on a different route named my arts and crafts.
- A user can filter his own saved art whether it is customizable or not. He can update the art with details like name, description, customizable, category, rating and photo url
- A user can delete their art by their preference. The delete button has confirmation prompts to prevent accidental deletions.

Technology : Html , Css, Javascript, Tailwind Css, React JS, Express Js, MongoDB, Swiper JS

Book's Palace

A website to keep track which books you wish to read and you have already read.

- A user can create an account and login securely. Then users can save the books they have read or the books they want to read in the wish list.
- A user can know about a book's details and also know about audio books with the help of this website
- A user can see how many pages they have to read visually with the help of a colorful graph chart.

Technology : Html , Css, Javascript, Tailwind Css, React JS, Express Js, MongoDB, Daisy UI
